

DATA ENGINEERING CONSULTING

[Contact us](#)

Platform Engineering

We design and build robust, scalable data platforms that empower your teams. Our platform engineering expertise streamlines pipelines, automates operations, and accelerates reliable, end-to-end data delivery.

Data Governance

We deliver rigorous, scalable data governance that secures, structures, and elevates your information assets. We guide you from strategy to execution, ensuring trust, compliance, and business-ready data at every step.

Teaching

We share our expertise through high-level teaching and corporate training, turning complex data and engineering concepts into practical, actionable skills. We empower teams and future engineers to excel with modern, industry-ready practices.

Business first

We focus on what matters most: delivering measurable business value. Every solution we design is driven by your goals, ensuring technology serves your strategy—not the other way around.

- 1 🚩 What is the URL of the Data Product Marketplace for the Customer domain? (500 points)
- 2 ✅ Provide the URL of a certified Data Product. (500 points)
- 3 ❓ What are the two upstream data products of "All Sales"? (500 points)
- 4 ❓ What are the 3 data products that are consumers of "All sales"? (500 points)
(Note: Instead of using lineage, you can check the 'Data Product Consumers' section on the data product page.)

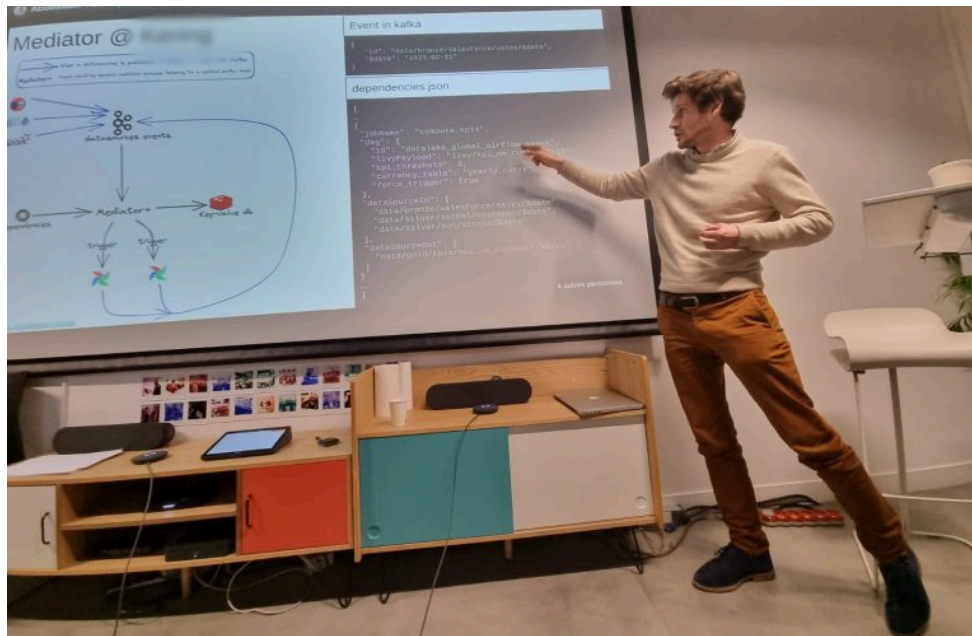

2025: Gamify learning

Grooptown developed an application to help clients learn using data tools in a gamified way. The app had a great success !

2024: le Flambeau de la Vie

Grooptown sponsored a wonderful symbolic race to share great messages about the necessity of organ donation. [Full story here.](#)

2023: Thibaut as speaker at the Paris Apache Airflow Meetup

Thibaut explained how he used the best of Airflow features and extended them in order to create an enterprise grade Data Platform. Here is the [link to the meetup](#).

2022: IA Contest on Coding Game

This year's contest was different from previous ones as we did it on CodingGame with ClashOfCode, and it was a lot of fun ! [Full story here](#)

2021: Escape Game made by Grootptown

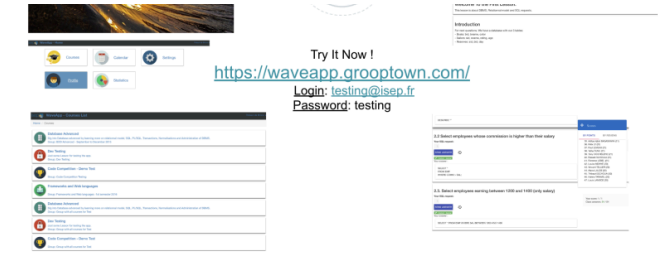

A fun Escape Game in the world of Flash Invader. You can play it here:

<https://grootptown-tech.gitlab.io/escape-game-space-invaders/#/>

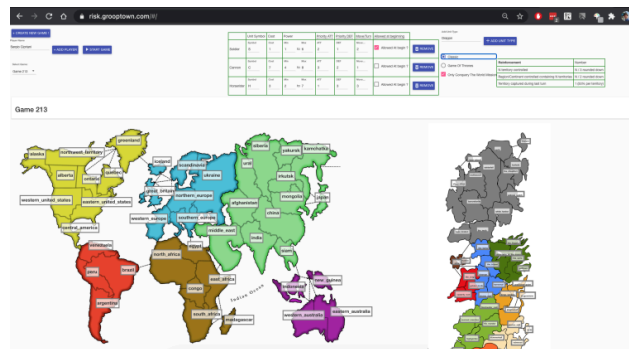

2020: AI Competition on Robot Turtles

A very impressive winning AI which won 2 drones, congratulations to the students behind this great AI!

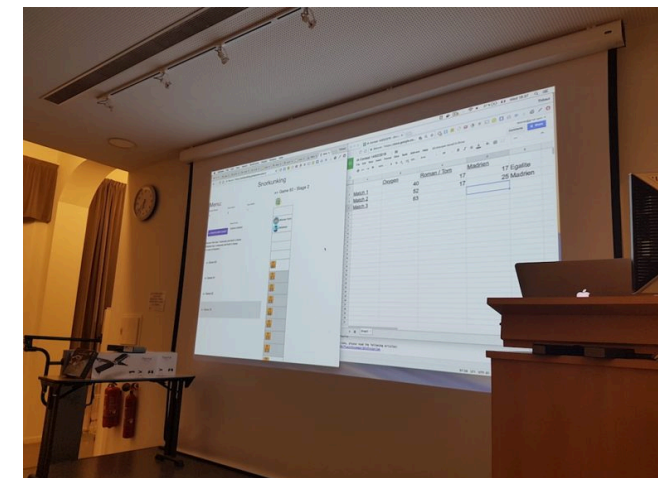

2015-2020: Wave App

To help students learn more effectively, Grootptown created an interactive platform where they can complete exercises, give feedback to peers, and progress in a fully gamified environment.

2018: AI contest on Risk

Four Parrot drones and Robot Turtles games to be won. The AI battles were fantastic. Congratulations to the winners!

classic map or on Westeros from Game of Thrones.

Snorkunking

Grooptown is organizing an AI competition around the game Snorkunking. Congratulations to the winners and finalists who won Parrot drones.

2017: Grooptown sponsored the Night of Computer Science

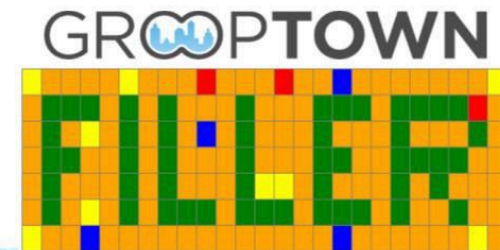

Grooptown created two challenges:

- Easter Egg with a JS Library
- Chatbot with a Recommendation Algorithm

2016: Grooptown hosts Big Data Paris Meetup at ISEP

Thibaut de Broca did a talk speaking about technologies of Hadoop eco-system. All nicely displayed in a advent calendar.

Artificial Intelligence Contest

Le 7 Juin à 18h en L012

(sont admis dans l'amphi seulement les inscrits au concours).

Lots sponsorisé par Grooptown:

1er Lot: Lima Cloud

2sd Lot: PowerBall

Le Ring: <http://62.210.105.118:8081>

2015: Grooptown launches Artificial Intelligence Contest at ISEP

This year, Grooptown innovates while launching an annual contest on Artificial Intelligence: students compete by bringing

display a nice UI in the amphitheater with
the live matches of the Als.

"If you torture data long enough, it will confess."

Ronald Coase, Prix Nobel d'Economie

Having worked at Google, small and large IT services companies, as a self-employed entrepreneur, and as a co-founder of a startup, Thibaut now leads Groomtown, offering top-tier Big Data expertise. He also teaches computer science at ISEP for third- and fourth-year students since 2012 and provides advanced Big Data training at Telecom Paris, 3IL and CNAM.
